

CD Factory 2000 Software Quick Start Guide

Version 2.0

Sonic Foundry Sound Forge XP and CD Architect Software Installation

1. To install the Sonic Foundry Software, insert the CD-ROM into your drive.
2. In Windows '95/98, click on the Start button and select Run
3. Click on Browse and select the drive letter of your CD-ROM drive.
4. Double click on the SonicFoundry folder and double click on SF_XP.exe.
5. The Sonic Foundry Software installation program will start; pausing only to ask in which directory you would like to install the program (we suggest that you use the default values).
6. The installation procedure will install the program on the hard drive
7. After installation, the computer will need to be restarted.
8. ***After Windows is restarted, locate SCSIMMC.CDD in the folder where CD Architect has been installed. This is usually C:\Program Files\Sound Forge XP if the default location was used.***
9. ***Rename SCSIMMC.CDD to SCSIMMC.OLD or any name with a different 3-letter extension.***
10. ***Copy the new SCSIMMC.CDD file from D:\SonicFoundry\ to C:\Program Files\Sound Forge XP(assuming that D: is the drive letter of your CD Reader).***
11. ***Launch CD Architect and choose the Yamaha CRW8824S using Select Drive under Options. You should automatically see the Select Drive window when you launch CD Architect from the Tools menu of Sound Forge XP.***
