

# Twice the Throughput!

The Orbit PRO is a standalone-automated CD duplicator with powerful features built into a sleek design. As the next generation of the award winning Orbit II, the Orbit PRO touts two 24X recorders for ultra high-speed CD duplication. With an Easy Copy Mode for the novice user and Expert Mode for the advanced professional, the Orbit PRO is a perfect fit in any production or studio environment. Batch mode is a timesaving feature of the Orbit PRO, which allows unattended duplication of multiple master CDs as the system automatically detects the format of each master CD.

The Orbit PRO includes a hard drive for multiple CD image archival and track extraction for custom audio CD compilations. To handle the 150-disc capacity of the system, a removable output hopper has been designed to unload the media onto a spindle minimizing handling of the discs. To ensure recording stability, the recording speed can be slowed for media not certified for high-speed duplication. Taiyo Yuden media is suggested for high-speed 24x duplication.

- HDD for Audio track extraction and CD image archival
- Disc to Disc and HDD to Disc copy modes
- Copy, Copy + Verify and Verify Only modes
- Batch mode for unattended duplication of different masters
- Selectable recording speeds up to 24x
- 150 disc input
- Output tray for rejects
- Removable output bin for easy disc unloading
- Sleek, charcoal black, molded enclosure for desktop or studio
- 4-Line lit display with intuitive menu display and detailed error reporting

#### Specifications:

Mechanical: 17" H X 30" W X 13" D  
Weight: 43 Lbs.  
Electrical: 100-240 VAC 50/60 Hz  
Operating Environment: 42-26 deg. F  
Operating RH: 20-80% non-condensing
