

The Inferno

The Inferno is a high performance, standalone CD Recordable tower duplication system, featuring precision technology from Hoei Sangyo, Inc. Utilizing new 12X CD recording speed, these units are expandable with Master - Slave configurations, and provide the user with easy one touch operation. The Inferno can be adjusted to record at 2X, 4X, or 8X speeds for a variety of applications. MicroBoards Technology offers the MicroCare Warranty Service Program for Inferno users, minimizing downtime or repair costs. Ask your Account Manager for Details!

Inferno Features:

VMI Card Technology

-The VMI card system allows easy expansion as your duplication requirements increase. Each Master Unit Can support one slave tower. The VMI card allows the user to add two (2) more slave towers. A total of up to Forty drives can be chained together!

Switchable Recording Speed

- Users may vary the record speed from 2X, 4X and 8X on the front panel keyboard interface, according to disc type and application.

Easy Operation

- Automatic CD format detection allows you to start duplicating by pressing ONE button.

SP/DIF Interface

-Soon to become available with the 12X version, users may install the "Fusion DA" interface card in the back panel of the Inferno, which connects to any digital audio device. Audio data from DAT tape or other digital source can be downloaded to the internal hard drive in the unit, and converted to a Red Book audio image.

Track Extraction

- Customize audio CDs by downloading individual audio tracks from a variety of selections. Create both Track at Once and Disc at Once CDs with the hard drive.

Drive Cooling Air Slots

- The aerodynamic design of the Inferno allows for constant air flow, controlling heat buildup inside the duplicator MTBF ratings and the overall life of the unit are dramatically increased.

Flex HD

- With the hard drive, the Inferno allows the user to begin the copy job at staggered start intervals, providing the operator with minimal downtime when high volume and quick turnaround are required.

Inferno 12X Recorder Benefits

-Inferno 12X recorders are designed specifically for CD-R duplication environments. The ruggedized tray mechanism combined with a high performance grade laser pick up provides Inferno users with the extended life of the system and assured data integrity.

Other features include:

-Running OPC
-Support for ISRC and Subindex Recording
-Media Condition Check

**EARTH SHAKING
12X Speed!**

Master Specifications:

(10) 12X recorders
(1) 40X external reader
One VMI Card Slot
LCD Interface
Switchable 115/230 Power Supply
HXWxD: 20" X 8" X 18"
Weight: 55 lbs.

Slave #1 Specifications:

(10) 12X recorders
Slave Interface Cabling
115/230 Power Supply
HXWxD: 20" X 8" X 18"
Weight: 50 lbs.
